### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-33 and 53-77, wherein the claimed invention comprises an image production apparatus, comprising: a correction means for determining a value of the driving signal for said optical modulation device corresponding to the target light intensity and inputting the determined driving signal to said driving circuit; and a measurement means for measuring the intensities of the modulated lights emitted from said optical modulation devices and determining a modulation characteristic of each of said optical modulation devices representative of a relationship between the driving signal applied to the optical modulation device and the intensity of the modulated light emitted from the optical modulation device, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandi N Thomas whose telephone number is 571-272-2341. The examiner can normally be reached on 8-5.
